

Who will care for me if I require hospitalization?

If you require hospitalization, it is ideal to have your regular provider in our office be as involved in your hospital care as possible. In some cases, if you are admitted to the hospital subsequent to a visit in our office, your doctor here will see you daily in the hospital and provide your care there. When your provider in this office cannot be as directly involved in your hospital care, you will receive care from a hospitalist physician. Our providers have developed a working relationship with the hospitalists at CMC-University Hospital, and recommend that you select that location, if possible, to maximize adequate communication between your hospitalist physician and your provider in our office.
